

DID YOU KNOW?

The City of Federal Heights Fire Department is the 1st Fire Department in the State of Colorado to achieve an ISO Class #1.

That sounds great...what is an ISO Class #1?

- ➔ The ISO rating is a number on a relative scale from 1 to 10, with 1 being the very best fire protection services and 10 representing less than minimum recognized fire protection.
- ➔ This rating has been achieved by less than 1/4 of 1% of Fire Departments Nationwide. The ISO currently evaluates over 50,000 Fire Departments Nationwide with only 241 earning the Class 1 rating.
- ➔ Federal Heights ISO Class 1 Rating was achieved through a collaborative effort of all Firefighters, Police (Dispatch), Public Works (Water Supply) as well as the continuous support from City Council and Administration, and demonstrates the dedication to provide high quality Public Safety for residents and business owners in Federal Heights.

What does this mean to YOU as a Resident or Business Owner?

- ➔ Some insurance companies may use the ISO Rating to help establish fair premiums for fire insurance and will generally offer lower premiums in communities with better protection. Please check with your insurance company to determine if a discount is available.
- ➔ By offering an economic benefit to communities who invest in their firefighting services, the program provides an additional incentive for improving and maintaining public fire protection.
- ➔ The most significant community benefit of the ISO Rating System is its effect on losses. Data from insurance losses confirms the relationship between excellent fire protection (as measured by the ISO) and low fire losses.
